EDUCATION

Saraswati College of Engineering <i>B.E. in Computer Engineering (Expected 2027)</i>	Navi Mumbai, India 2023 – 2027
Ambuja Vidya Niketan <i>Class XII — CBSE (CS: 89/100, Overall: 69.4%)</i>	Chandrapur, India 2023
Manikgarh Cement English School <i>Class X — CBSE (IT: 91/100, Overall: 81.8%)</i>	Chandrapur, India 2021

TECHNICAL SKILLS

Languages: Python, SQL (MySQL), Java, TypeScript, JavaScript, HTML, CSS
Libraries & Frameworks: Pandas, Matplotlib, Seaborn, React, Tailwind CSS, Zustand, Framer Motion, GSAP
Tools: Git, GitHub, VS Code, MySQL Workbench, Vite
Concepts: Data Analysis, Data Visualization, CRUD Applications, DSA, Agile Methodologies

SELECTED PROJECTS

Student Result Analyzer <i>Python, Pandas, Matplotlib, Seaborn</i> - Engineered a data analysis pipeline that processes 50+ student records, generating insights like grade distributions, pass/fail ratios, and subject averages. - Designed 5+ modern, publication-ready visual charts utilizing Seaborn to clearly communicate complex datasets. - Architected a scalable CLI using <code>argparse</code> with modular scripts separating data generation and analysis logic.	GitHub <i>Data Analysis</i>
SONIVIO Music Player <i>React, TypeScript, Tailwind CSS, Zustand, YouTube Data API v3</i> - Developed a high-performance web-based music streaming platform featuring a modern dark-mode aesthetic and seamless YouTube Data API track integration. - Implemented an optimized state management architecture using Zustand, enabling real-time favorites, history, and active track syncing without unnecessary re-renders. - Enhanced UX with complex micro-interactions and smooth page transitions using Framer Motion.	GitHub Live <i>Full-Stack Frontend</i>
Expense Tracker with SQL <i>Python, MySQL</i> - Built a resilient CLI expense tracking application supporting complete CRUD operations and robust persistent MySQL storage. - Optimized SQL query performance to handle 500+ simulated records, enabling real-time category-wise breakdowns and monthly financial summaries.	GitHub <i>Backend & Database</i>
School Fee Management System <i>Python, MySQL, Tabulate</i> - Constructed a comprehensive administrative CLI tool managing student profiles and fee transactions using optimized relational JOIN queries across multiple MySQL tables. - Hardened the system against erroneous operations by implementing strict input validation, duplicate fee prevention, and confirmation prompts for destructive actions.	GitHub <i>Database Management</i>

CERTIFICATIONS & COURSES

Generative AI Certification <i>Comprehensive Generative AI Training</i>	EduBridge (Capgemini × SAP × NSDC) Feb. 2026
Generative AI Mastery Workshop <i>Intensive Workshop</i>	OpenAI Academy × NxtWave Sep. 2025

Software Engineering Job Simulation
Architecture, Security, Programming, Testing & Agile

Accenture via Forage
Jun. 2025

Python Basics to Brilliance Masterclass
Python Development

Ethan's Tech Solutions
Apr. 2025

EXTRACURRICULAR ACTIVITIES

Core Member, Coding Club
Focus on Data Analytics & AI/ML initiatives

Saraswati College of Engineering
2024 – Present

Smart India Hackathon (SIH) 2024
Developed and pitched a technical government solution as part of a highly competitive team

National Level
2024

NCC Cadet
Achieved NCC 'A' Certificate with Grade A

21 MAH BN NCC Wardha, Ministry of Defence
2019 – 2020
